

How to set-up Wireless for Apple Mac OSX 10.5 – Intel Edition

Step 1 – click on the Airport icon

Step 2 - turn Airport on

Step 3 – go to Join Other Network

Step 4 – Enter the following:

Network Name: UMD-WIFI-R

Security: WPA Enterprise

User Name: Core\<(your username)

Password: (your Core Password)

802.1X: set to automatic

Remember this network: make sure that this is checked.

Please see graphic for example:

Enter the name of the network.

Enter the name of the network you want to join, and then enter the password if necessary. You can also click Show Networks to see a list of available networks.

Network Name:

Security:

User Name:

Password:

802.1X:

Remember this network

Step 5: click the continue button to install certificate

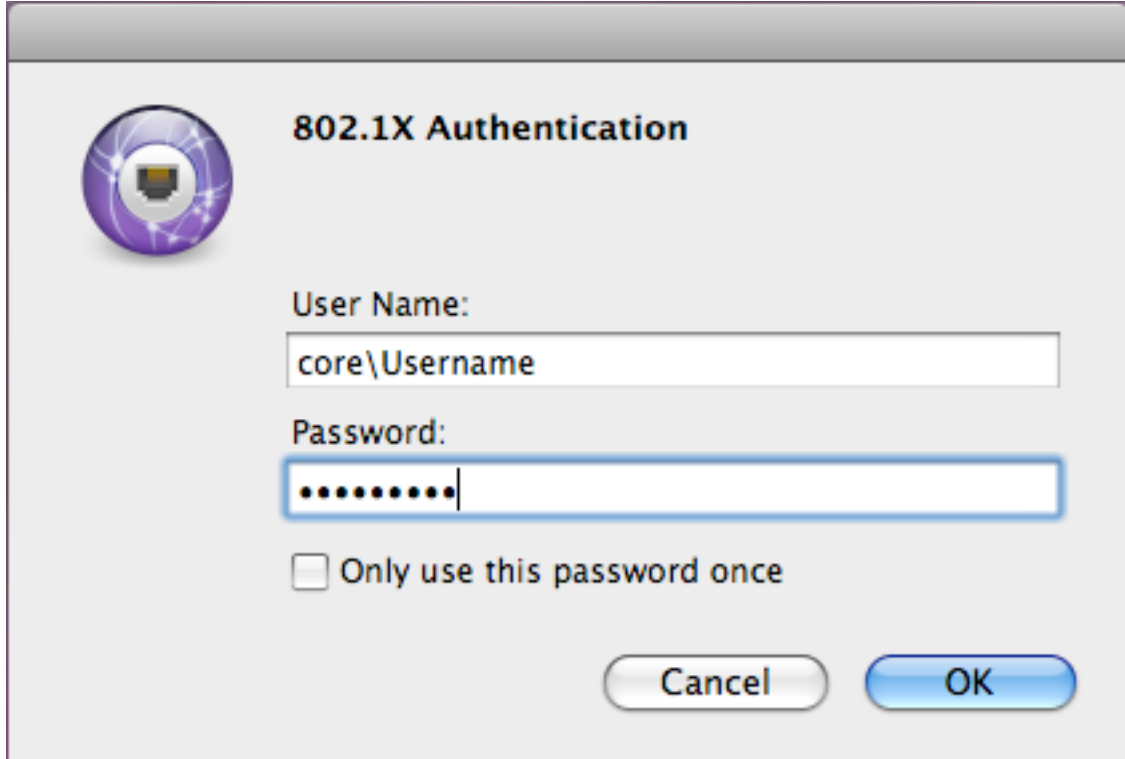

Verify Certificate

802.1X Authentication

The server certificate is not trusted because there are no explicit trust settings.

Step 6: Enter username and password again

The image shows a Windows-style dialog box titled "802.1X Authentication". On the left is a circular icon with a network card symbol. The dialog contains two text input fields: "User Name:" with the text "core\Username" and "Password:" with ten dots. Below the password field is a checkbox labeled "Only use this password once". At the bottom right are "Cancel" and "OK" buttons.

All done! 

You will now be able to access the UMDNJ Network.
